What the experts say...

A highly adjustable ergonomic chair suited for taller users with many adaptations available.

Waterfall front edge reduces pressure behind your knees.

The Independent mechanism allows an accurate angle between the seat and backrest to be achieved; this is important for accurate control of your posture. When the chair is unlocked it 'rocks' from a semi-knee tilt point allowing good movement to be achieved without adjusting your trunk to thigh angle. A tension control allows you to adjust how easy or difficult it is to recline in the chair.

'S' shaped to support your whole back.

Good lumbar support to help you maintain the natural curvature of your lumbar region.

Contoured seat to fit your thighs comfortably.
