3

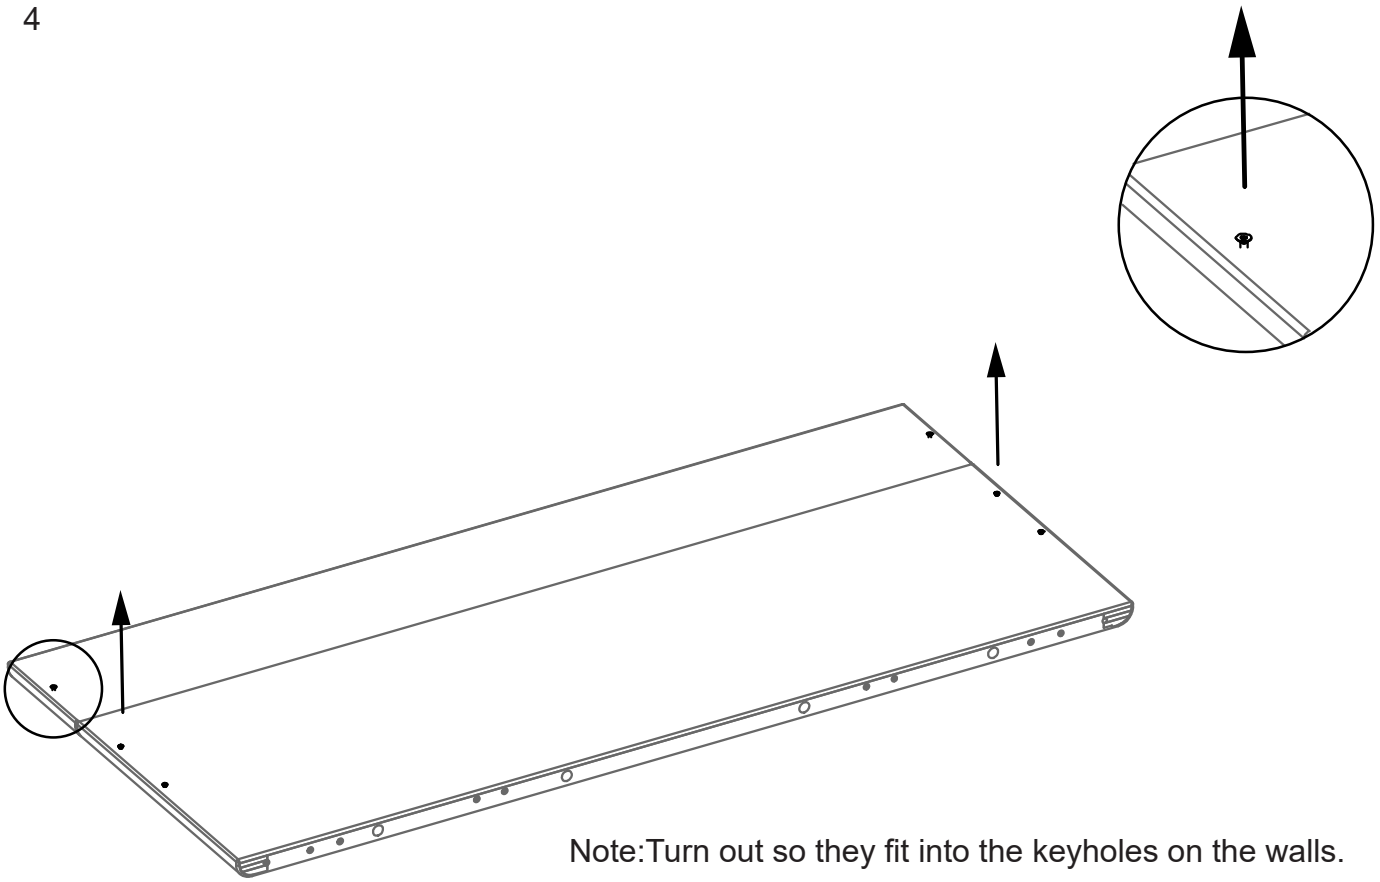
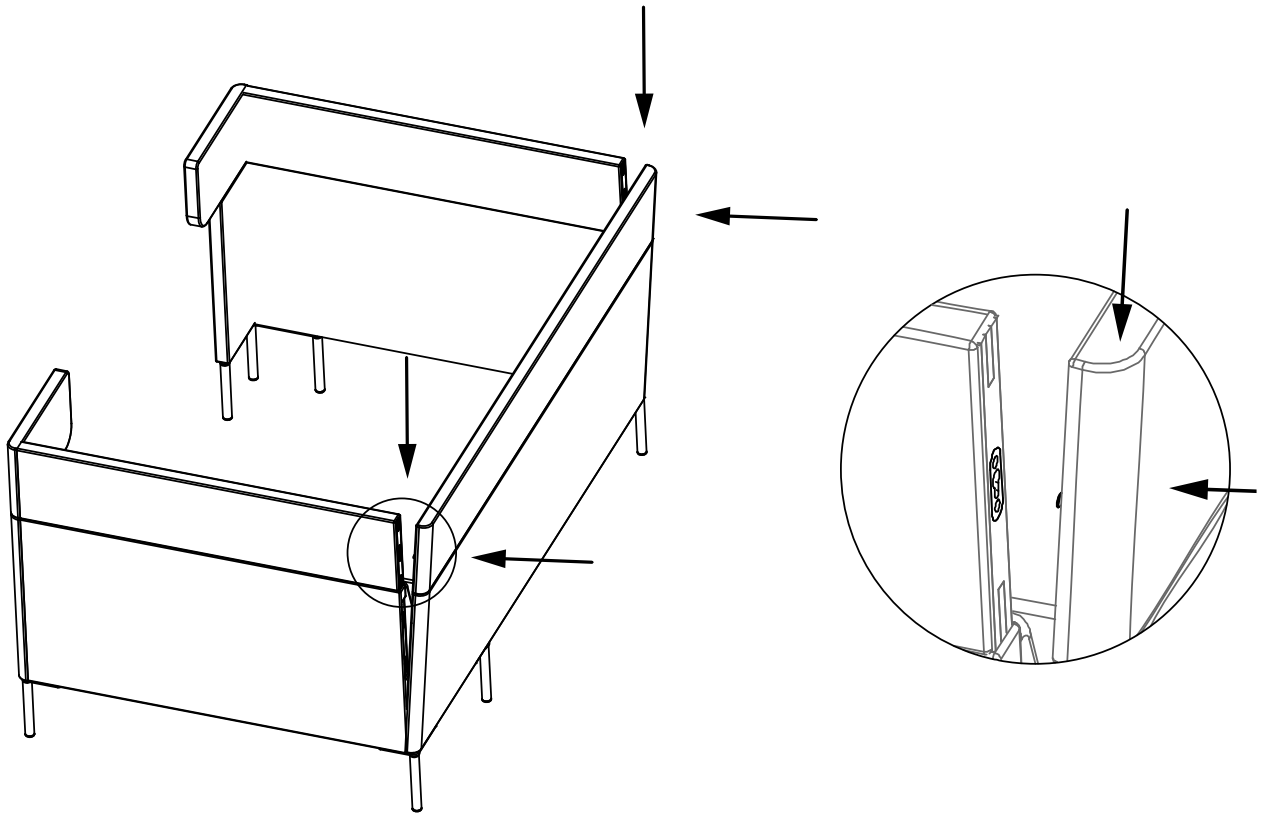
Note: Screwed it approximately 1cm out.

4



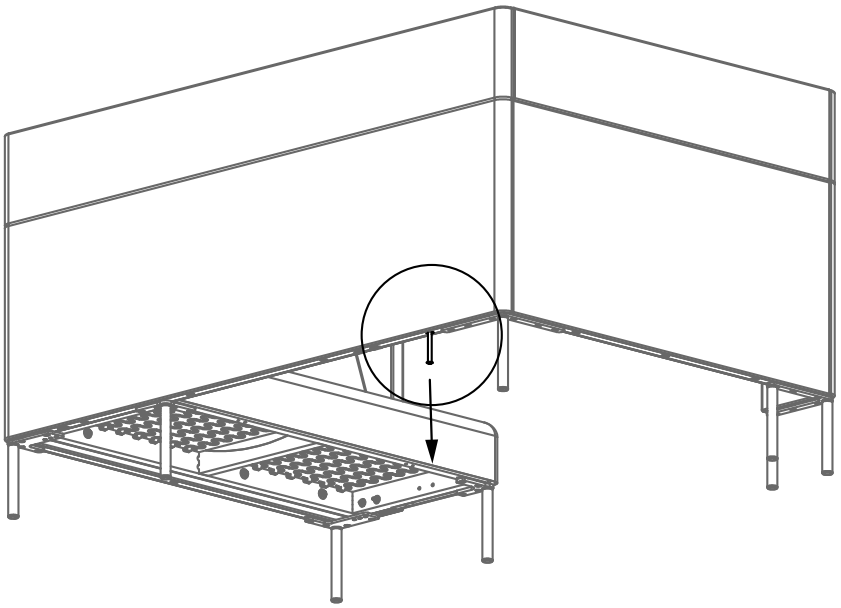
Note:Turn out so they fit into the keyholes on the walls.

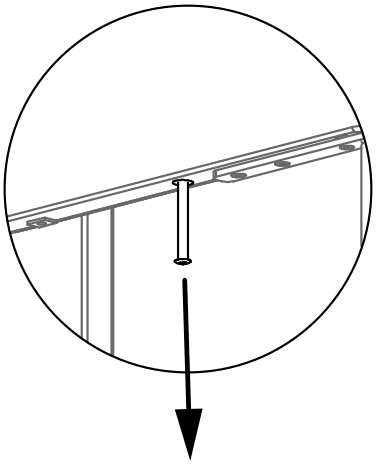
5

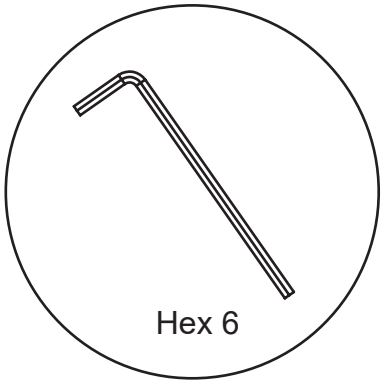


Note: The 3 screws on each side fit into the keyholes on the wall.

6





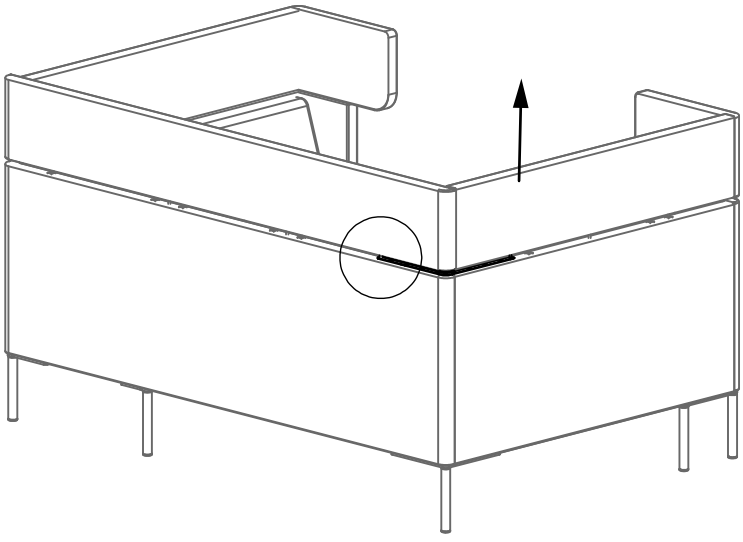


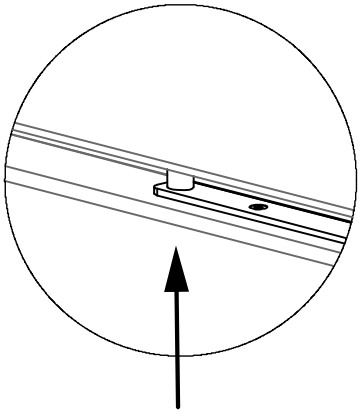
Hex 6

Note: Let the threaded rod drop to the floor.

7

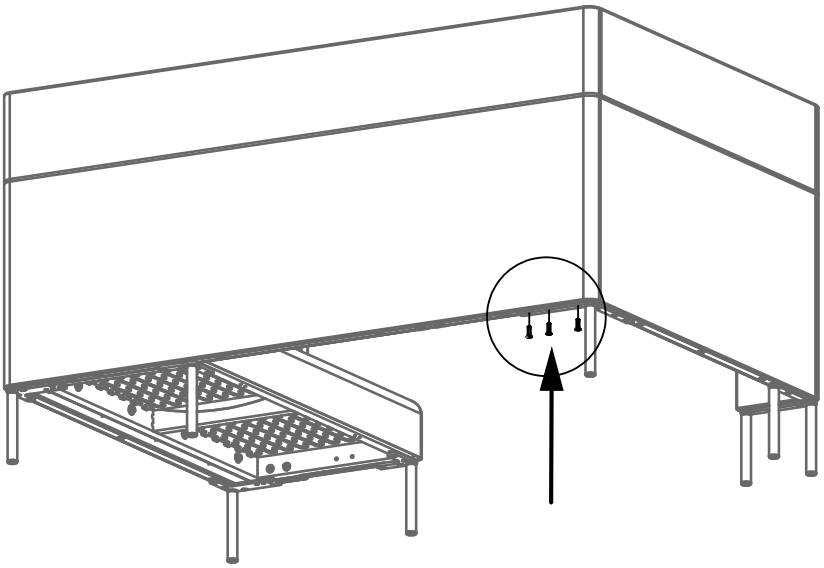
Note: Lift the toppart of the wall 1 cm.

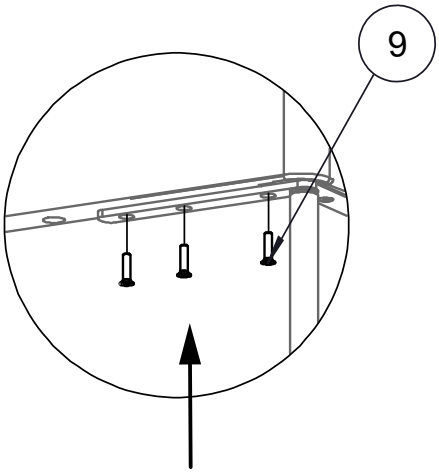




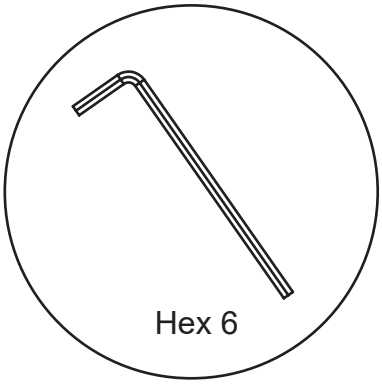
Note: Press the threaded rod so it is placed through the L-profiles hole.

8



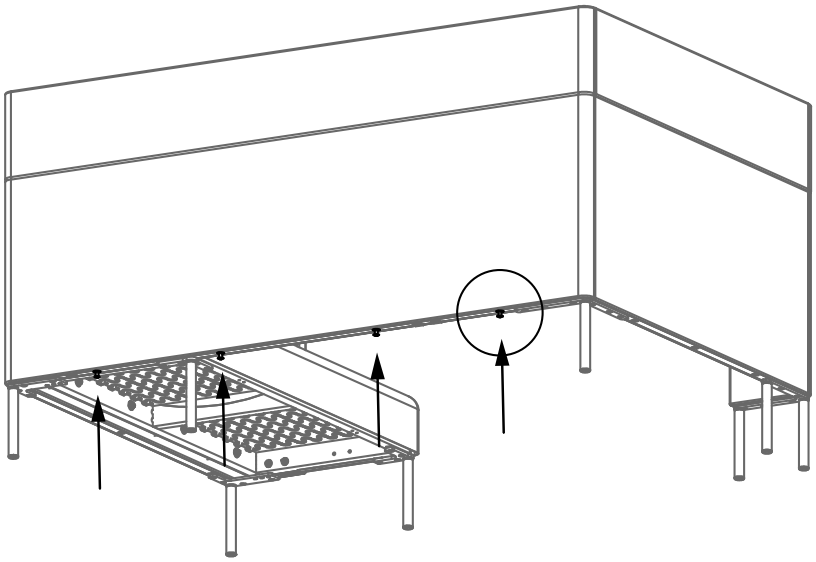


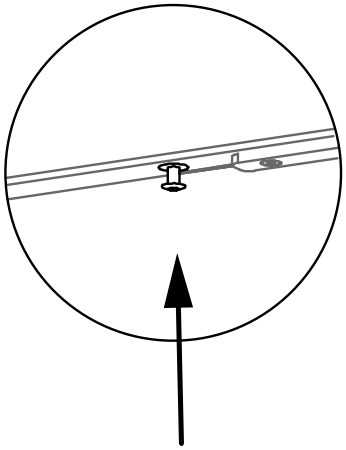
Note: it is important the footplate is a little loose, before tightening all the bolts.



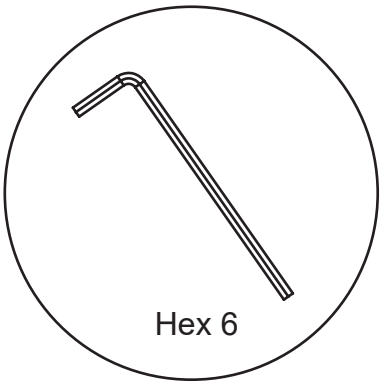
Hex 6

9



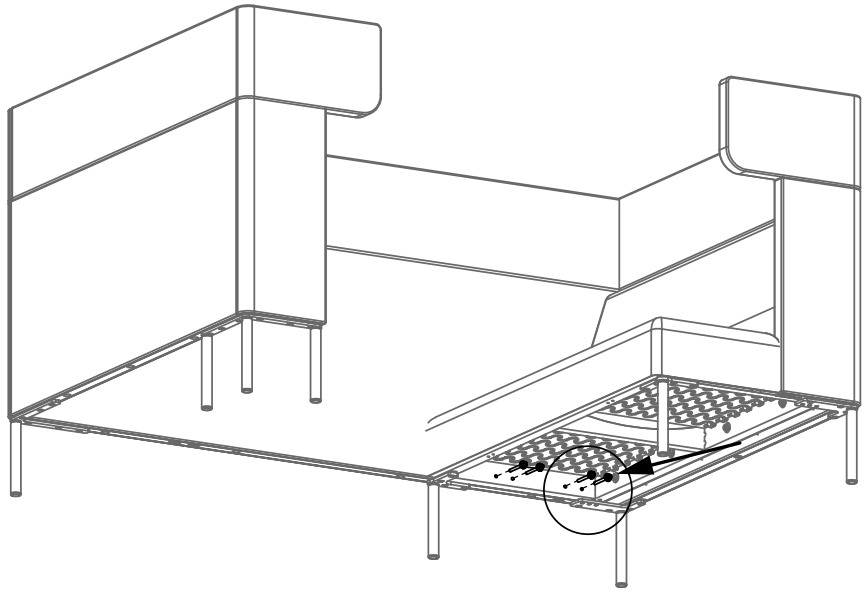


Note: Tighten until the gap in the backwall is gone.

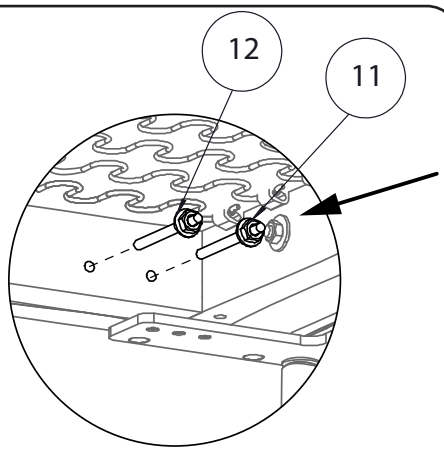


Hex 6

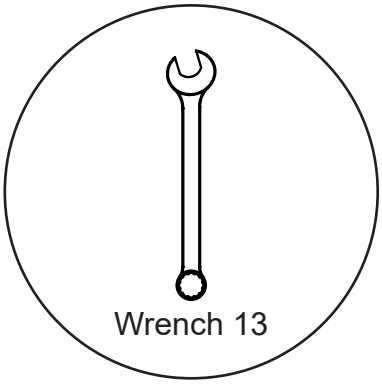
10



Note: It is important that the couch and wall are pressed together.

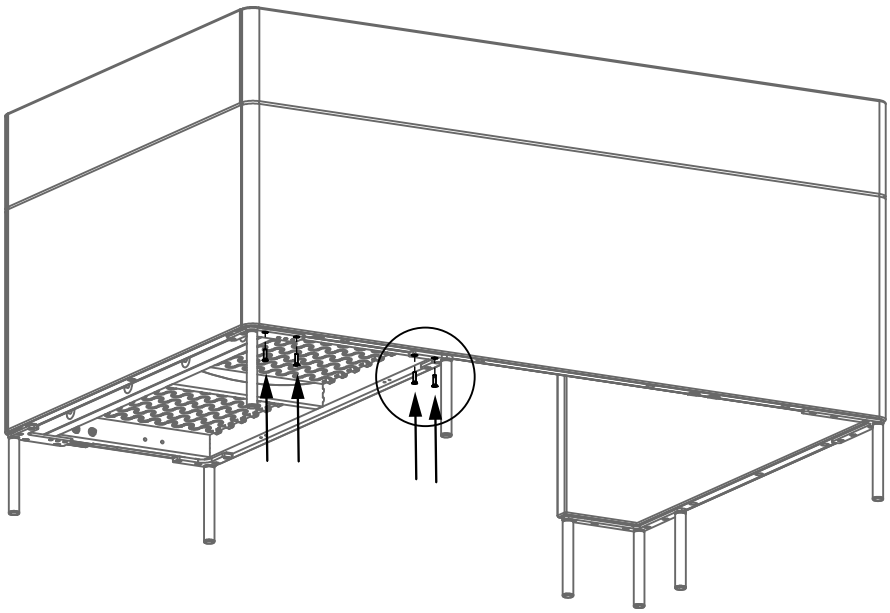


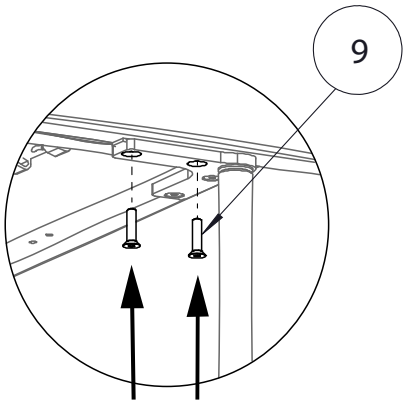
Note: tighten so hard, that you can hear the wood squeak.



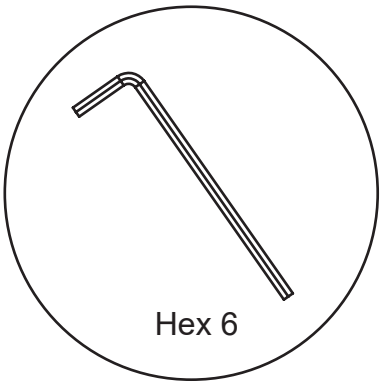
Wrench 13

11



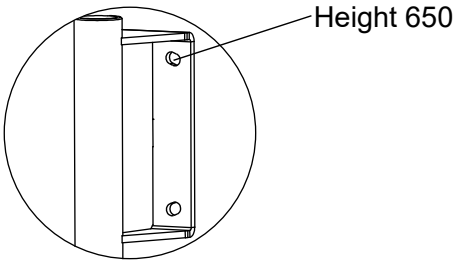


Note: Tweak the couch a little while aiming the bolts into the holes.

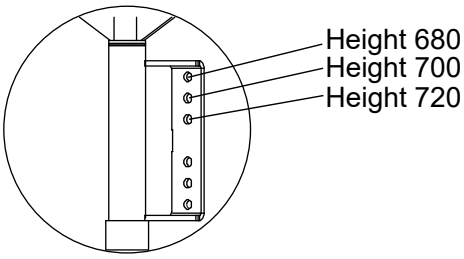


Hex 6

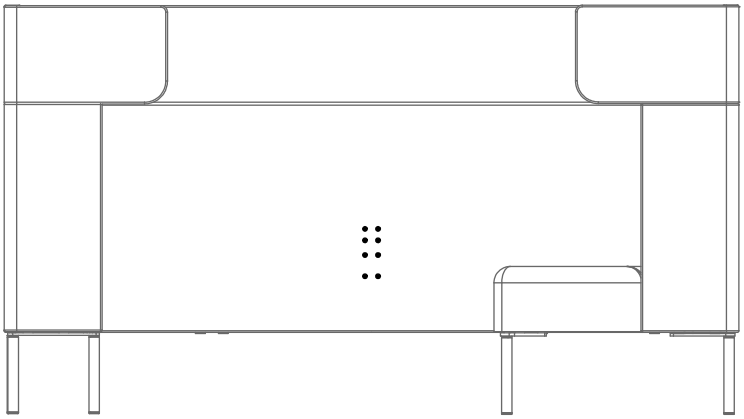
12



Use wall hole no. 2 & 4 from the top



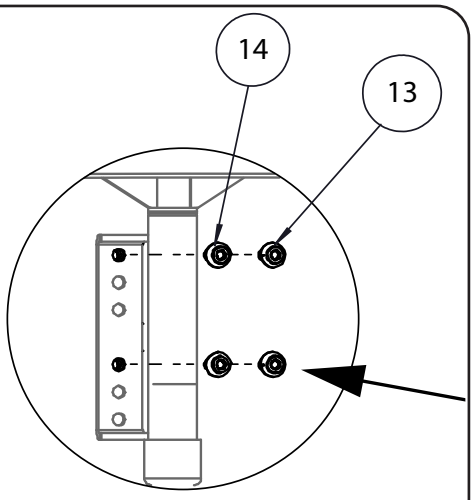
Use wall hole no. 1 & 3 from the top

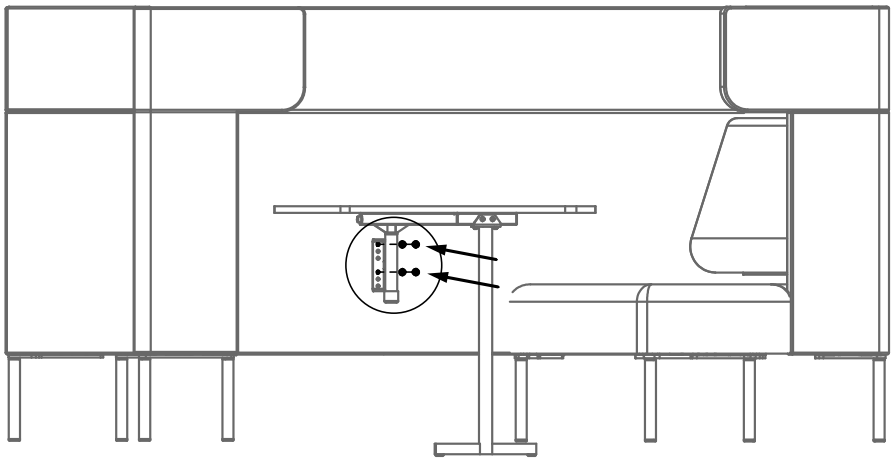


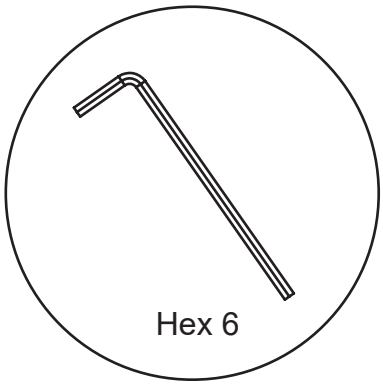
Note: The 8 holes for the pivottable which is marked with a white pin.
Cut a 1cm cross lines on top of each the 4 holes you want to attach screws in.

13

Note: screw the bolts loosely in with the fingers, before tightening.







Note: When moving the FourUs Work Booth, it is important to be 4 or more people, to take as much pressure off the legs as possible.
