

Baffle

Designed by Marc Sadler

Baffle is a patented system designed to hang Snowsound® sound absorbing panels from the ceiling, showcasing its lightness and elegance. The adjustable height of the cables and the array of sizes and colours make it possible to achieve compositions that can be personalised for aesthetics. The patented joining system of the panel to the cables is completely invisible; a small cylindrical joint hides the anchoring system. The Baffle anchors can be positioned along the upper edge of the panel, without particular limitations of space between the cables, in order to simplify ceiling installation.

- 4 weeks
- 5 year warranty

100% Recyclable
